

## *Heartbeat Matters*

# The outcome of CI-128 does not change the Mission to Protect ALL Life

In response to the question John Adams was asked regarding why he did not give up on ending slavery, he responded, ***“Duty is ours, results are God’s”***.

As was the case with slavery, abortion is an abhorrent practice that many justify with responses that equate to nothing more than, *“...calling evil good and good evil...putting darkness for light and light for darkness.”* (Isaiah 5:20 NIV). As Christians, we are called to stand in defense of life day after day, year after year, decade after decade knowing that God will take care of the timing.

My personal perspective is that as horrible as CI-128 is, it served as a catalyst to ignite the **fire of “David” within many Montanans** to battle the Goliath of the many out of state millionaires and federal committees pushing an agenda that exploits vulnerable women and children.

We, as Montanans, must continue to foster the connections we have each made within our communities and across Montana for OUR strength to defend the voiceless lies within our UNITED voice based in God’s Truth that *“Two are better than one, because they have a good reward for their toil. For if they fall, one will lift up his fellow...”* (Ecclesiastes 4:9-11 NIV)

CI-128 represented more than a ballot box battle. It was and is a symptom of a growing cancer and spiritual battle within our society which denies a human being the unalienable rights endowed by our Creator, “that among these are **Life**, Liberty and the Pursuit of Happiness”.

Our duty to stand for life is far from over, and despite the victories or defeats, we must continue to be passionate, disciplined, and dedicated to defending life. That is only possible through a concerted, organized, and united effort on our part.

What is next is up to us as individuals, organizations and communities. We have proven over these past few months that we can fight with the fire of David; the challenge now is to expand that fire within the parameters of a defined strategy that educates and inspires more Montanans to embrace and support a prolife stance, one heart at a time.

## Montana State MARCH for LIFE

Friday, January 3, 2025  
11:30am—1pm

This Year's National March for Life Theme Is:

**“LIFE” - It's Why We March!**

Montana's *March for Life* will be held in the Capitol rotunda starting at 11:30am where we will celebrate, honor, and recognize the many state and local individuals, churches, and organizations who chose to defend life and oppose CI-128.

We will conclude this celebration with a Prayerful March around the Capitol in celebration of life!

## Abortion is...

- ◆ **Abortion** is promoted as “reproductive rights” and “women’s healthcare” when in reality it is a culture of death that takes the lives of over 2,800 children in the womb daily\*

- ◆ **Abortion** is a tool to cover the crimes of sex traffickers, a “profession” that has more than tripled under the Biden/Harris administration (Scan the QR Code to take you to the extensive Free Press Article, 10/29/24).

- ◆ **Abortion** is described as a “religious ritual” and a “sacramental act that confirms the rights of bodily autonomy” by the Satanic Temple of America, a tax exempt religious organization based in Salem, MA, and who have launched two abortion clinics of their own; one in New Mexico and the other in Virginia (scan the QR code to read the article).

- ◆ **Abortion** is frequently performed in the third trimester of pregnancy. Colorado recorded 468 third trimester abortions in 2023 of which 137 were performed at 28 weeks or later, New Mexico performed 390 abortions at 28 weeks or later, one of the highest late-term abortion totals in the country (source: lozier institute). The CDC’s records show that 4100 abortions occurred in the United States after 21 weeks (this number is derived from ONLY 41 reporting areas of which New York and California are not included as they do not participate in reporting—scan the QR code for more information).

**Abortion excludes God from the equation!**

## Abortion Pill Reversal SAVES Lives!

The Pro-Choice advocates love to chant their mantra that “it is a woman’s right to make her own healthcare decisions”; however, that mantra apparently only applies when that woman is seeking an abortion to end her child’s life and not when she “chooses” to take the abortion reversal pill to save her child’s life.

The abortion pill is approved for use up to 10 weeks (Planned Parenthood will provide it up to 11 weeks) and is comprised of two pills. The first chemical, mifepristone (RU486) is the pill that blocks the effects of progesterone, a hormone necessary for a pregnancy to thrive. The second pill, misoprostol, expels the baby. If a woman decides she regrets taking the first pill, the pregnancy may be saved by taking the Abortion Reversal Pill.

Abortion Pill Reversal is an updated application of a treatment used since the 1950s to combat miscarriage. It is simply a dose of progesterone to counteract the effects of RU486 which suppresses/blocks production of progesterone.

To date, statistics show that more than 5,000 baby lives, and counting, have been saved thanks to the Abortion Pill Reversal Protocol (according to the Abortion Pill Rescue, a network of more than 1,400 healthcare professionals, pregnancy medical clinics and hospitals that provide the APR protocol)

Even a study conducted with 754 women in 2018 and posted on the NIH National Library of Medicine (2018 Spring;33(1):21-31) states a successful reversal rate of 64% and further states, “no apparent increased risk of birth defects. Conclusion: The reversal of the effects of mifepristone using progesterone is safe and effective.”

**In 2021, 54% of all abortions were chemical abortions. In 2023 that number rose to 63%.**

This is an alarming trend. Abortion clinics are slowly being replaced by the “convenience” of an impersonal tele-health visit with a “medical professional” at a time when a woman is making one of the most consequential decisions of her life. The abortion pill is then made available for pickup at her local pharmacy or even home delivery courtesy of the US Postal Service. In reality, there is nothing easy or convenient about a DIY abortion. It is dangerous, it is traumatic and it is anything but compassionate to encourage a woman to expel her child in the solitary confinement of her bathroom.

Get the facts on abortion so you can compassionately and confidently share them with others who may not know the truth about abortion. Then you can genuinely leave the fruits of your conversation in God’s hands to open their eyes and hearts. “Duty is ours, results are God’s”

*Thank you*

ProLife Montana would like to say “**thank you**” to the many organizations, churches, and individuals across MT who strengthened Defend Life MT.

You brought light to the dark language of CI-128 and gave voters an opportunity to hear the Truth regarding the many harms this ballot issue will inflict on Montana women and children.
